Semi Dice

PCN reference: **MFGLOC-KCS**

Subject: **Novacap Commercial Product Manufacturing Location Change**

Linda,

Novacap is part of the Knowles Capacitor Group which has an ISO9001 approved manufacturing centre of excellence located in Suzhou, China. To take advantage of the Knowles Capacitor Group facility, MLCC manufacture for your commercial products will be relocated to China.

The product transfer does not affect component specifications such as form fit or function and, as such, there will be no change to Novacap part numbers.

Extensive qualification tests have been conducted on product manufactured by the Knowles Capacitor Group Suzhou facility and a summary of these tests are available on request.

If you have any questions please contact the Novacap Sales or QA department.

Yours sincerely,

Bodee Maxwell
Quality Assurance Manager
